CHICAGO, Sept. 10 .. - Wheat lives on spiritual bull excitement and the cotton pep. Cotton again around the high points with December closing \$20.85 up 103 points after a top of \$21.45. Sellers in wheat and cotton have temporarily retired Argentine with crop news not clear today, but looks as if the talk of a possible 50 percent wheat loss for want of rain in two weeks is much exaggerated. Winnipeg cash wheat premiums 1 to 3c lower. Export United States corn and wheat sales this week look small. Farm reserves of corn large. New crop large and corn in general shows little change. Wheat visible should gain two million if wheat advances Monday and Tuesday. The 5 to 8c break now due may come in the middle of next week. Much, however, depends on Argentine weather news.
